

How does the internet work?

What to do

Can you help the webcrawler find the webpage?
Trace the path, but don't get lost in the large **amaze**-ing place of the internet!

Joke
Q: How do you catch a web crawler?
A: "In - ter - NET"

Did you know?
 The internet search engine Google is named after the number, "googol". This number is a 1 followed by ONE HUNDRED ZEROES
