Early Childhood Workshop

(Ages: 0-5)

This workshop provides little scientists with the opportunity to play, learn and explore at their own space. Throughout the workshop, child-parent interactions are fostered by encouraging children to ask “why?”, “how?”, and “what if?”

Supported by the latest neuroscience research into early brain development, our Early Childhood Workshops provide a safe, exciting and interactive environment for children to engage in self-initiated play.

This unique travelling program encourages adults and young children to play, explore and discover together. The program fosters young children’s natural curiosity and encourages them to ask why, how and what if?

The 60 minute workshop allows children to explore four different areas of learning: light, living things, push and pull, and sound.

- Light
- Living things
- Push and pull
- Sound

Activities include playing with shadows and light, creating sounds, identifying smells, investigating invertebrates and more.

Early years learning framework outcomes:

- Children are confident and involved learners.
- Children are effective communicators.

Western Australian Curriculum links

- biological, physical and chemical sciences.
- science inquiry skills.
- science as a human endeavour.

We can visit kindergartens, playgroups, libraries, childcare centres and other early learning centres.

Cost

Program	Participant	Cost
Early Childhood Workshop	60+ children	\$6.00 per child
	Less than 60 children	\$360.00 flat rate
	Playgroup rate	\$200.00 flat rate

Requirements

It is essential for a member of your organisation to meet our staff on arrival to ensure Occupational Safety and Health requirements are met.

Early Childhood Workshop require a cleared indoor, ground-floor area of at least 20m² in size. Please ensure that this space is not being used 1 hour before and after the show for set up and pack down.
